

A direction indicator cat. 6

Safety on the road is the undisputed necessity. Its guarantee is a clear visibility – ensured by the perfect lighting. At OE Industry we not only understand this standard, but also put it into practice.

We have combined high-end optics and mechanics with eye-catching aesthetics. In order to convey a sense of stability, of unconditional security, we have at the same time created the exciting feeling of being noticed.

IN THE RIGHT DIRECTION ONLY.

A direction indicator is an essential component of every vehicle. The key value, sufficient visibility of the vehicle, is required as a warning and warning lamp. This is why we developed at OE Industry another model of the side indicator, of the category 6, in our new line Next. The marking is DX4.

DX4

Original in its simplicity.

Catalog numbers:

OEI532003625_D OEI532003625_I OEI532003625_O

The name "Next" stands for a new – even more subtle – style. Category 6 – indicates that the direction indicator lamp has been manufactured for vehicles with a length of more than 6 metres. The DX4 version is a modern character and a timeless guarantee of absolute security.

There are no compromises at OE Industry. Expect more and more.

Even from turn signals.
